TECHNICAL SKILLS

- BIW Welding Process
- Fixture Costing & Estimation
- Techno-Commercial Estimation
- Manufacturing Process Analysis
- Process Optimization
- Cycle-Time Optimization
- Engineering Cost Analysis
- Engineering Documentation
- Technical Proposal Preparation
- Business & Engineering Reporting

SOFTWARE & TOOLS

- MS Excel (Advanced)
- MS PowerPoint
- On-shape Cad (Intermediate)
- AutoCAD (Basic)
- Catia (Basic)

PROFESSIONAL SKILLS

- Analytical Thinking
- Problem Solving
- Technical Communication
- Team Collaboration
- Documentation Management
- Time Management
- Engineering Coordination
- Business Communication

LANGUAGES

- English
- Hindi

RITIK DANDIR

Mechanical Engineer | BIW | Fixture Costing & Techno-Commercial Estimation

Building Efficient Manufacturing Solutions

Through Engineering, Analysis & Innovation

PROFESSIONAL SUMMARY

Mechanical Engineering professional with experience in automotive manufacturing engineering, BIW welding processes, fixture costing, techno-commercial estimation, process analysis, cycle-time optimization, and engineering documentation.

Currently working as an Executive Engineer at JBM Group. Experienced in preparing engineering cost estimates and techno-commercial offers, supporting fixture costing activities, analyzing manufacturing processes, developing business dashboards, and coordinating technical information for engineering and commercial proposals.

Strong interest in manufacturing engineering, fixture/tooling, process optimization, engineering costing, and project engineering within the automotive industry.

PROFESSIONAL EXPERIENCE

JBM GROUP | Gurugram

Executive Engineer – Engineering |2024 – Present |

- Prepare techno-commercial offers and engineering cost estimates based on project requirements, technical specifications, and defined scope.
- Support BIW welding process-related engineering activities and evaluation of manufacturing requirements.
- Perform engineering and manufacturing process analysis to identify opportunities for process optimization and improved manufacturing efficiency.
- Support cycle-time analysis and optimization activities for manufacturing processes.
- Perform fixture costing and estimation activities, including evaluation of engineering requirements and associated costs.
- Prepare and maintain engineering and business documentation for project and management requirements.
- Develop business dashboards and analytical reports using MS Excel and available tools.
- Coordinate technical information from relevant stakeholders for preparation of commercial and engineering proposals.
- Analyse engineering requirements and associated cost elements to support commercial decision-making and project estimation.
- Prepare technical information and presentations for communication of engineering and commercial requirements.

CORE ENGINEERING EXPERTISE

- BIW Welding Process
- Fixture Costing & Estimation
- Techno-Commercial Estimation
- Manufacturing Process Analysis
- Process Optimization
- Cycle-Time Optimization
- Engineering Cost Analysis
- Engineering Documentation
- Technical Proposal Preparation
- Business & Engineering Reporting
- Excel-Based Analysis
- Dashboard Development

EDUCATION

Precision Engineering Certificate Course -2024

SSR Global Skill Park, Bhopal

Bachelor of Technology (B.Tech) – Mechanical Engineering - 2023

Chameli Devi Group of Institutions, Indore

Class XII – PCM -2019

Shree Vaishnav Vidya Mandir, Khargone

Class X -2016

Shree Vaishnav Vidya Mandir, Khargone
